Resolving Liquor Theft Problems Requires a Comprehensive Approach!

According to the *National Retail Security Survey*, US & Canadian Liquor Stores lose millions of dollars a year to shrink, which is comprised of shoplifting, employee theft, paperwork errors and fraud. Of that total, shoplifting accounts for more than 36% of retail shrink-related losses.

Operating successfully in today's retail environment is a challenge

Your liquor retail store outlet organization is faced with theft losses that can often make the difference between a good profitable year and one that falls short of expectations. **Time Access Systems** is one of North America's largest supplier loss prevention systems, we are your Ideal supplier for anti-theft solutions!

Increase sales through open merchandising

Anti-Shoplifting detection systems can help your retail store curtail shoplifting without sacrificing open merchandising of high-value, high-theft merchandise.

You can still profit from consumer impulse buys while helping to ensure that you are protected from shoplifting attempts.

Anti-Shoplifting systems can help minimize crimes of opportunity and create a more secure environment for sales associates and customers.

Specially Priced
System Package

Additional Items Accessories:

Bottle Tags

Tag Detacher

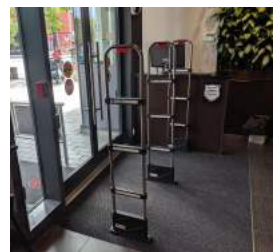

Labels

Label
Deactivator

8.2 Phazor
MHz Panels

Single Door Application

Double Door Application

Phazor Detection System Features:

- Able to detect hard tags approx 3 to 4 feet on either side
- Able to detect labels approx 2.5 to 3 feet or more on either side
- Multiple units can be placed to protect a wider opening
- System can be easily installed by the customer 3 Year Limited Warranty

System Specifications:

The 8.2MHz Phazor System is a transceiver system that requires only one antenna to make it work. This system can detect both hard tags and labels. These systems require no synchronization between multiple panels nor do they require synchronization to our deactivators. This significantly reduces installation time as well as servicing. The use of a transceiver system greatly reduces the instances of "phantom" or false alarms. **Electrical:** Input 110 - 120 VAC - Output 14 VAC
Height: 60.5 (152.4cm) - **Weight:** 11 lbs (5.7kg) - **Depth:** 1" (2.54cm) - **Width:** 14" (30.48cm) - **Frequency:** 8.2MHz
