Standalone Large LED 6" Digital Display Clock with Multiple Functions with Countdown & WiFi Option

Model: TAS/WiFi-6-DC

- Long Distance Readable With 170 SMD LED lights the bright, bold, vivid-Red LED 6 inches single digital Wall Clock with large display are easy to read from across the room. Great viewing Experience indoor, whether in office, church, Warehouse, Lobby, Classroom, Conference, library, Kitchen, indoor pool, and production facility.
- Smart Control Options Using WiFi access point to realize wireless control via web browser using your smart phone or PC, constant software upgrading improve user experiences from better to excellent. Friendly user interface makes setup and control much easier. You can still use the easy-to-use infrared Remote Control to set up and control your clock. App is available as optional, ask support team.
- Pre-program Countdowns / Timers / Alarms / DST Pre-program your desired countdowns and save it to relative button. You can run countdowns in seconds, minutes and hours. Just press one button to repeat the countdowns. Three modes of countdowns and timers and more. No need to worry about changing your wall clock for DST. The wall clock automatically adjusts to Daylight Saving Time.
- High accuracy and Multiple mounting options Built-in technology to use WiFi to connect to a standard Internet time server. With this feature, it maintains current time automatically without intervention. Keyholes on the back of clock for easy wall-mounting and integrated tripod mounting hole, free to install and use anywhere, and electrical wire for concealed installation in-wall.
- Auto-Rotate Screen and ultra thin design With built-in G sensor, place the clock in any direction you like. No need to worry about which side is power outlet. Ultra thin frame, acrylic glazed cover, and ABS plastic ensures the wall clock is light weighted and shatter resistant.

Standalone Large LED 6" Digital Display Clock
