is included free of charge with all **Key-Box** key  
management systems with no annual fees!

# Key-Box Key Systems are Powered By **KeyWin - 6 PRO OL Network Software**

## Key Management Software with Total Accountability

### KeyWin - 6 PRO OL Network Software

**Gives you total control. Easy to use, Easy to Manage**

Flexible KeyWin Pro makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

### KeyWin - 6 PRO OL

#### Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

### KeyWin - 6 PRO OL

#### Provides total Control of your keys - Even from the other side of the world

KeyWin 6 keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin-Pro key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.

#### KeyWin - 6 PRO OL is Loaded with Features

#### Easy to Use

The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

#### Create User Groups

You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

#### Name Keys

You give each key a name of your choice, or a key ID, to create order in your key management.

# KeyWin-6 PRO OL

**Intelligent Search Functions** The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

**Visual Cabinet View** Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

**Time Channel** Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

**Event Log** All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

**Backup** You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

**Alarm Indication** When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

**Export** You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

**Communication Settings** You have a number of possible communication settings that can be synchronized with your network.

**Alarm Settings** You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

## KeyWin - 6 PRO OL Software and KEYBOX Security Key Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin5 Pro, where all events are logged and saved
