RF Key Exit Alert Systems

Are Your Employees Leaving The Facilities With Your Keys*!*

Just think of what the cost of a lost key might be for your facilities!

It could cost you thousands of dollars to re key or change the facilities locks not to mention the security issues that a misplaced/lost key can cause!

Our unique RF key fobs are extremely sensitive the RF detectors will always detect if your keys are leaving your facility

We have low cost solution to your key exiting problems with our key exit alert system

Ideal for the Gaming Industry and All Sorts of Organizations

Ensuring security in the gaming/entertainment industry can be a daunting task that requires advanced solutions that address multiple needs. Whether at a Casino or Football game, there are thousands of employees, visitors and equipment that need to be monitored from a central location. Exit Key Alert Systems provide facilities with the technology needed to solve this problem.

The **RF** key fobs can be attached to key rings and configured to automatically trigger an alarm should the tagged key chain approach an exit. Many states require mandatory re-keying of slot machines if the keys are taken outside the building. By sounding the alarm before the keys leave the building, it can save the organization thousands of dollars in re-keying costs!

CASINO FACILITIES   **COMMERCIAL FACILITIES**   **LAW ENFORCEMENT**   **JAILS/CORRECTIONAL**

Time Access Systems Inc. can provide the solution to your key tracking problems with our Key Exit Alert System. Our system will alert security if any of your employees attempt to leave the premises with the facilities keys. Our key exit alert system will simply pre-vent anyone from taking keys off site. The system not only works in tandem with all standard or automated key systems but will also work as a standalone solution. Time Access Systems We offer consultation and valuable recommendations for key management systems. We offer over 30 years of experience designing and implementing various types of systems and solutions for the gaming industry
