Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Automated Key Management Systems

Choosing the right key system for your key management requirement is an important task to ensuring that you are choosing a key system that will secure your valuable keys 24/7 Key-Box is an easy intelligent choice as it's the only key system in the market place that offers its exclusive Secure-Fob 100% solid metal intelligent key fobs. Each key fob is individually stored in place inside the cabinet to ensure keys are not removed by authorized users

Secure-Fob
Exclusive 100% solid metal intelligent key fobs

Key-Box

Intelligent solutions for securing your valuable vehicle keys

A brief description on how the Key-Box Secure-Fob intelligent key fob works

The way the **Key-Box** key systems with individual intelligent Key Fobs works is each individual user is issued a pre-selected PIN number. The authorized user will then enter his/her PIN on the keypad and located on the key cabinet, the cabinet door will automatically open and the authorized user would have access to the vehicle keys they require. The system will record when the keys were taken and when they are returned. If the keys are not returned within the curfew the system will automatically generate an email and send it to management to alert them that a key or keys have not been returned within the curfew, and who the user is etc. The system gives you a full audit trail 24/7 of who took the keys, when they were returned, plus the system will make your staff more accountable for your valuable vehicle/asset/facilities keys.

Our Secure-Fob 100% solid metal key fobs
is the intelligent choice for securing keys/assets

Choosing the size of the key slot capacity in your Key-Box cabinet is an easy task Simply choose the number of key strips you require in the cabinet each key strip contains 14 key slots. Each 9700 SC cabinet can hold up to 66 key strips.

The systems come complete with software, set up instructions and a 3 year limited warranty.

Key-Box Key Management Systems
# Technical Specifications

9700 SC Series

Modular Design Features
Designed to accommodate between 14 and 924 keys (or key sets), the innovative 9700 SC Series design allows for starting small and later expanding by adding multiples of 14 key positions (called expansion key strips) as required.

Expansion None Locking Key Strips provide a solution for organizations requiring less security but still an audit of key usage. LED lighting indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key slot expansion key strip with LED indicating lighting

The cabinets are supplied with 3 sliding drawers. The control panel consists of the user interface which includes the screen, keypad and access card or biometric reader.

PC Software Administration
The 9700 SC Series is administered from the user friendly KeyWin 5 Pro software supporting a Microsoft Access or SQL database.
The 9700 SC Series can communicate with the KeyWin 5-Pro software using a range of different options including Ethernet, GPRS, RS485, RS232 and modem.
Multiple systems can be networked together over a local or wide area network to provide accountability for a limitless number of keys administrated from multiple PC workstations running the KeyWin 5-Pro software. KeyWin can manage multiple 9700 SC cabinets.

User Identification
The 9700 SC Series can support any type of access control device required to identify a user to the key system. Supported devices include RFID proximity readers from all leading access control manufacturers, magstripe, barcode and biometric technologies such as fingerprint, etc.
