The Intelligent Choice

Key-Box 14's innovative network ready security key management system provides secure solutions for small to medium facilities/businesses with the latest intelligent automated key system. The system is simple, efficient and affordable. Key-Box 14 helps track and account for every key/keys which are individually locked in place ensuring that critical facilities/business operations are secured and not jeopardized. The system is very easy to set up just plug and play

Our high quality key systems are North America's lowest priced networked PC based systems, with Key-Box systems you'll always have full access and control from your office desktop PC for administration etc. Our system will email alarm alerts in case of incidents such as users not returning their key/keys within their curfew period etc. Why settle for less with an inferior key management system when you can have a PC based key-box key system for the price of a standalone!

Intelligent Key Management Solutions For All Facilities

Affordable Secure Solutions

What is Key-Box 14?

Key-Box 14 is a sophisticated PC Based network ready key management system which combines innovative high technology and robust design to provide small and medium sized businesses with the advanced management of 14 keys or keysets in an affordable plug and play system

- 14 robust long life solid metal key fobs with tamper proof key rings
- 14 locking key slot receptors with LED's
- Robust power coated rust resistant steel cabinet
- Email alerts
- Emergency door release functions
- Audible alarms
- Key-Box 14 can be expanded a further 28 key slots in the future as your needs grow
- 3 year limited warranty

How does the Key-Box 14 work

Ensuring that the right keys are available to the right people at the right times is a concern for every organization

The user simply enters his/her unique assigned PIN to gain access to the key cabinet. Optional card access readers are available to match your existing access cards. Also available is our high quality Bio-metric fingerprint access readers

All keys and keysets are individually locked by the Key-Box 14 system green LED's indicate those keys to which the user has access to all other keys will stay locked and will continue to remain locked in place

Keys are easily returned to the key cabinet the user enters his/her PIN on the keypad the door will automatically open the key/keys are simply inserted back in their slots and are locked in place

Key-Box 14 secure key rings
The secure one time tamper proof security ring is cost effective and simple to apply without the need for special tools.

Key-Box 14 Special Package Includes:

- 14 Key slots with 9400 SC expandable key cabinet
- 14 intelligent solid metal key fobs

KeyWin 5 Pro Software

Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Key Management Systems

Technical Specifications

9400 SC Series

Modular Design Features

Designed to accommodate **between 14 and 42 keys (or key sets)**, the innovative **9400 SC Series** design allows for starting small and later expanding by adding multiples of 14 key positions (called expansion key strips) as required.

Expansion Key Strips are defined as locking or non-locking. Locking receptor strips **lock the key fobs** in place restricting access to authorized personnel down to the individual key. Non-locking expansion strips provide a solution for organizations requiring less security but still an audit of key usage. **LED lighting** indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key slot locking expansion key strip with LED indicating lights

The cabinets can be supplied with a clear polycarbonate or optional metal door. The control panel consists of the user interface which includes the screen, keypad and access card or biometric reader.

PC Software Administration

The 9400 SC Series is administered from the user friendly **KeyWin 5 Pro software** supporting a **Microsoft Access** or **SQL database**.

The 9400 SC Series can communicate with the KeyWin 5-Pro software using a range of different options including **Ethernet, GPRS, RS485, RS232** and **modem**. **Multiple systems can be networked together** over a local or wide area network to provide accountability for a limitless number of keys administrated from multiple PC workstations running the KeyWin 5-Pro software.

User Identification

The 9400 SC Series can support any type of access control device required to identify a user to the key system. Supported devices include **RFID proximity readers** from all leading access control manufacturers, **magstripe, bar-code** and **biometric technologies** such as **fingerprint, etc.**

Specifications

Cabinet Dimensions: 746 x 370 x 140 mm

Weight: 25 kg

Power Supply: Input: AC120-240V
Output: VDC

Battery Backup: DC12V 3.2Ah (24hours)

Power Consumption: 65W max/0.3A

Cabinet Material: Steel

Color Options: Light Grey Powder Coated

Door Material: Solid Metal or optional Clear Polycarbonate

Operating Temp: Ambient For Indoor Use Only

Mounting: Wall or Cabinet stand mounted

Key Positions: 14-42
