TAS Challenger Series Sports Count Down Timer / Clocks

Challenger Series Model: TAS/GS6T-BTR-BA

- **High - Visibility Display :** Features a large 5 inch LED digital display digits that is bright and easy to read from a distance, even in bright sunlight. The brightness can be adjusted across five levels to suit different lighting conditions, from indoor use to outdoor events
 - **Versatile Timing Functions :** Functions as a countdown timer, count - up timer, and a regular 12/24 - hour clock. Allows users to start from a preset time and easily switch between modes with the remote control, making it suitable for various activities such as races, workouts, meetings, presentations and board games
 - **Convenient Wireless Control :** Comes with a remote control that enables users to start, stop and reset the timer from a distance, without having to walk up to it each time. This provides greater convenience and flexibility, especially when managing events or activities where the timer needs to be controlled
 - **Durable and Reliable Stand :** Includes a sturdy tripod stand that sets up quickly and provides excellent stability. It can withstand various environmental conditions, including high winds, making it suitable for outdoor use
- Multiple Power Options:** Can be powered by a plug and also has a battery - operated option, making it portable and usable in locations without electrical outlets, such as outdoor races or mountain bike events. 6+ hours of battery life, ensuring reliable operation during extended events or activities

Professional HQ Series Competition Count Down Timers

Professional HQ Series

Professional HQ Series Model: TAS/PRO-HQ-6-SCD

The Professional series high quality sports count down digital timers and clocks applies high quality ultra brightness LEDs. The continuous working time can reach up to 100,000 hours! Mainly used for running events or marathon races timing. It can easily help you to correct a time or adjust the time with either 12 or 24 hour display. Besides real time clock, this item can be used to countdown or up in hours minutes seconds. The maximum can reach 99 hours 59 minutes 59 seconds. More and more running events and marathon organization starts to use this clock for their events. You can edit, pause or stop a timing from 20 meters away(max 40 meters). The IP64 cabinet makes the clock work without its user any worries even when it's raining heavily used. The metal material with anti-rust painting makes the cabinet durable enough! You can either use the clock directly under the sun or in raining days! The feature of the cabinet is it's a open door maintenance. You can easily open the clock and replace defective part when the clock is damaged by mistake during your use. The plug varies from country to country, we will use the corresponding plug according which country the buyer comes from, So, you don't have to worry about your local voltage and plug standard. Besides, we also program the brightness adjustable by remote control manually in case a lower brightness required in some occasions.
