NEXT GENERATION

# KeyWin 6 Pro

## Smart, simple and Secure

KeyWin 6 comprises several work views, designed to make day-to-day management of keys much easier.

KeyWin 6 is the latest version of the market's most comprehensive administrative tool for securely and managing keys and valuables. One or more administrators can manage key cabinets and keys with the highest possible precision, from anywhere in the world.

It is easy for you to give access to individual users or groups and to connect them with the relevant keys or valuables. With its automatic registration you can keep track of who is using what. The expanded search and filtering simplifies your daily use, offering a higher level of precision.

## Key-Box

Powered by KeyWin 6 Pro

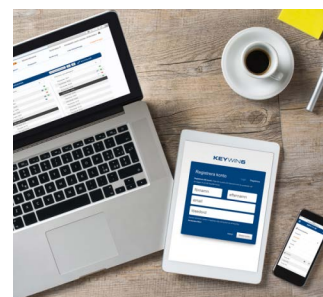

# Powerful Secure Solutions

## KeyWin 6 Pro now in the cloud!

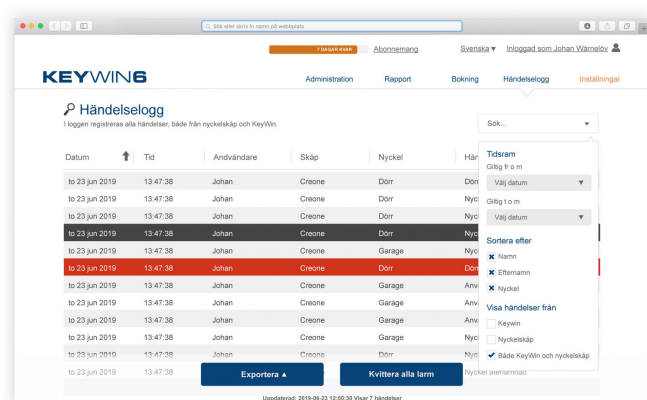

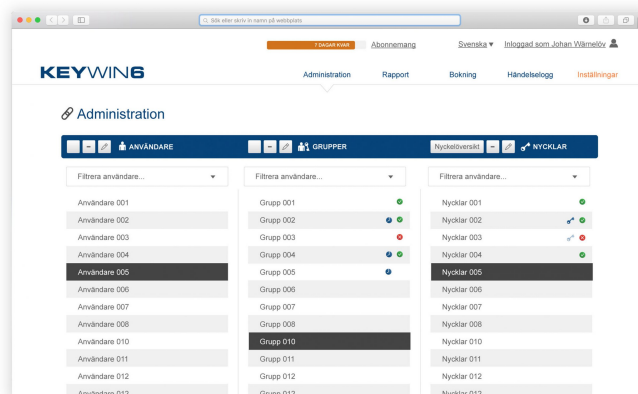

Digital systematisation, monitoring and control.

Let us show you the best possible way to administer your keys. We offer secure control and safe management, whether you handle a few – or a few thousand – keys.

### Administration

A smart search function makes it easy to get a complete overview. Finding the right user or key instantly. Mark a key to see which users and groups are linked to that specific key, or mark the user or group to see which keys have been linked to it.

### Event log

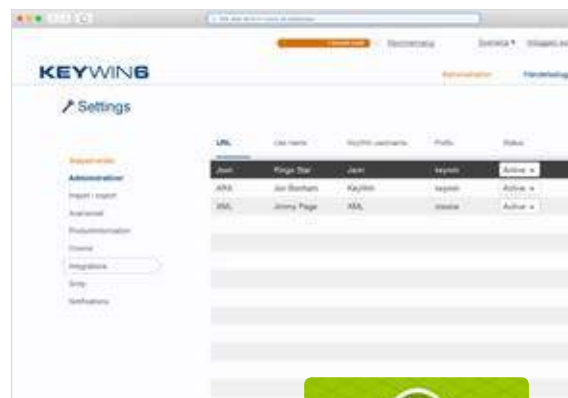

View all events in the log or choose the parts you need. The intelligent search function, with select and timeframe options, makes it easy for you to get the information or report you need.

All alarms in the log are clearly indicated in red giving you clear information about what or who triggered the alarm.

### System integration NEW

KeyWin is designed for full integration into existing systems without any additional implementation. KeyWin 6 is integrated into superordinate and existing systems, such as access control systems, alarm units, car hire systems, hotel systems and so on.

There are two options for integrating KeyWin 6 into a superordinate system – a sync engine or API. A sync engine if your software supports XML, SQL, JSON and LDAP. We use Swagger for APIs. Swagger is the world's largest framework of API developer tools for the Open API Specification.

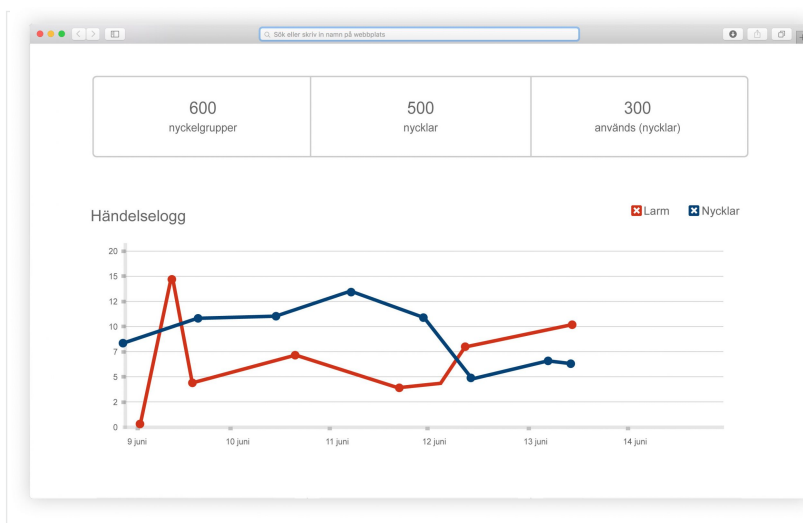

Connecting your **Key-Box** key cabinets and locker systems to **KeyWin 6** gives you additional advance control of your keys and more secure storage of your valuables. It enables you to check on keys and usage as well as the handling of valuables and equipment.

 **Reporting** NEW

Our **KeyWin 6** reporting system lets you keep track of your keys at all times. It provides a list of the number of key removals and alarms in any specific period. You can easily view a list of the most frequent system users or the most frequently used keys. The data is displayed in diagrams giving a clear overview of the use of the system.

 **Settings**

You can use the settings to install a new system and add or remove administrators. The tool is also used to manage more advanced settings, such as adding or removing card readers, integrations and e-mail notifications.

Användare	Nyckel	Datum från - till	Tid från - till
Abin	Nyckel 001	160212-160213	14:00-16:00
Robin	Nyckel 002	160216-160220	08:00-16:00
Johan	Nyckel 003	160211-160214	08:15-16:00
Rikard	Nyckel 004	160201-160205	09:30-10:30
Borg	Nyckel 005	160311-160314	09:15-15:00
Johnny	Nyckel 006	160312-160315	09:15-15:00
Abin	Nyckel 001	160212-160213	14:00-16:00
Robin	Nyckel 002	160216-160220	08:00-16:00
Johan	Nyckel 003	160211-160214	08:15-16:00

 **Booking** NEW

KeyWin6 has a key booking system that allows you to reserve the keys you need for a specific time. You can always be sure that they are available when you need them.

 **Hosting** NEW

Our KeyWin 6 web hosting service for your key management system has been developed in collaboration with Saab Combitech and offers the industry's highest level of IT security, along with seamless and intuitive functionality. What's more, both the web client and the cabinet's software are updated via our hosting service.

## Key-Win 6 Pro Powerful Software Features

### Easy to Use

The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

### Create User Groups

You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

### Name Keys

You give each key a name of your choice, or a key ID, to create order in your key management system

**Intelligent Search Functions**

The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

**Visual Cabinet View**

Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

**Time Channel**

Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

**Event Log**

All events are registered in the log, both from key cabinets and from KeyWin 6. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

**Backup**

You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

**Alarm Indication**

When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

**Export**

You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

**Communication Settings**

You have a number of possible communication settings that can be synchronized with your network.

**Alarm Settings**

You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

**KeyWin 6 - Pro and Key-Box Security Key Cabinets**

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin 6 Pro, where all events are logged and saved

**Key-Win 6 Pro Cloud Optional Software Upgrade**
